

How to Remove the Ear Cartilage from a Fox or Coyote

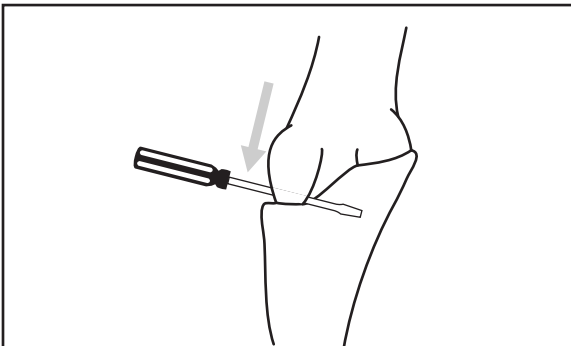

STEP 1

Skin fox/coyote down to ears as usual.

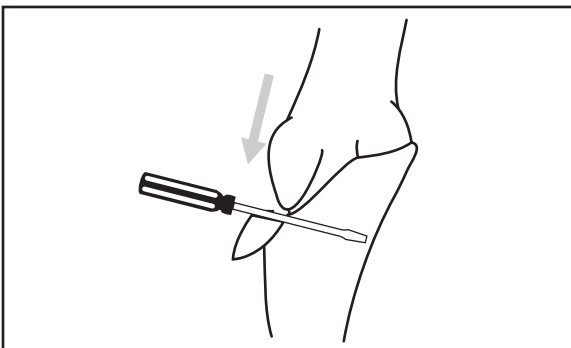

STEP 2

Insert screwdriver between ear and skull.

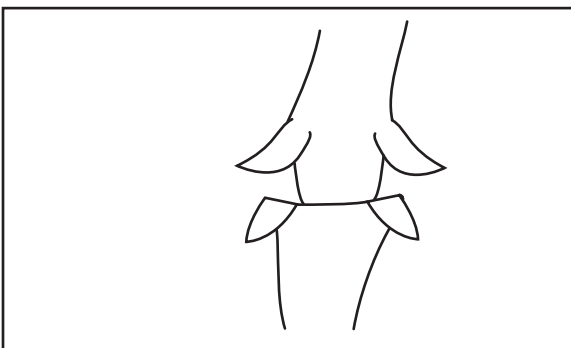

STEP 3

Pull straight down until the cartilage and fur pull apart.

STEP 4

The cartilage remains on the carcass and the back of the ear remains on the pelt.

STEP 5

Repeat process for the other ear and skin the rest of the pelt down to the nose.
